

DCHPC 2018

www.iahpc.ir

25th-27th November - Qom - Iran

Workshop
to Deep

Workshop on introduction to Deep Learning

Topics

- . Machine Learning basics
- . Deep Learning basics
- . Convolution Neural Network (CNN)
- . Recurrent Neural Network (RNN)

Speaker

Abdalsamad Keramatfar is a data engineer at SID (Scientific Information Database). His recent research is on combining multi-stream of comment's context for sentiment analysis. His research interests includes Deep Learning, Natural Language Processing and Mining Scientific Papers.

Objectives

- . Introduction to theoretical basics of machine learning and deep learning including objective of machine learning, supervised learning and backpropagation
- . Introduction to most important Deep Neural Networks architectures
- . Introduction to coding with most popular programming language (Python) and most popular package (Tensorflow) for Deep learning
